Technical Skills

- AWS / Azure / GCP
- Docker / Kubernetes
- Java / JavaScript
- Python
- ReactJs / NodeJs
- MongoDB / Firebase / Oracle DB
- SQL / MySQL
- Material-UI / Chakra-UI
- GIT / GitHub

Soft Skills

- Effective communication
- Problem solving
- Quick learning
- Good time management
- Critical thinking and analysis

Language

English

Sinhala

Education

2021 - 2024

BSc (Hons) Specializing in Information Technology

SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY (SLIIT)

2016 - 2017

Dual Diploma in Computing and English

NATIONS VICTORY CAMPUS - Negombo

Projects Experience

Hospital Management System

Hospital Management System project. The system has been developed by a team of eight members, for ITP module at SLIIT. each member has a specific role to play.
As the hospital admin, my function is to develop and maintain the admin dashboard.
This includes managing user accounts, monitoring the hospital's daily operations, generating reports, and handling any issues that arise within the system.

Technology: MongoDB, Express.js, React.js, Node.js, Material UI

Android Food Delivery App

The SLIIT 2nd year 2nd semester Mobile Application Development module project.
The application provides a user-friendly interface for customers to browse through different food items and select the ones they wish to purchase. Customers can also track the status of their orders and make payments securely through the application.

Technology: Java, Firebase, Android Studio

https://github.com/NirmalNaveen20/EatUp-FoodApp

School Management System

The SLIIT 1st year 2nd semester OOP module project is a school management system that has been developed by a team of four members. The project involved applying object-oriented programming concepts to create an efficient and effective system for managing school operations. The school management system includes features such as student registration, attendance tracking, grading, and reporting.

Technology: Java, Eclipse
